Prepared by JetPakt · ReviewSentinel methodology · Every finding below is tied to a verbatim public review.

Executive snapshot

Hey Kiddo is sitting at 3.4 stars across 487 public reviews, with roughly 44% of recent reviews rated 1–2 stars. That puts the rating 0.87 stars below the 3-peer local benchmark (4.27 average).

The three signals driving the most guest friction right now are Service Pacing · Staffing Ratios · Service-Fee Transparency. All are actionable inside 30–90 days without capex, and none require public apology statements.

Legal-review recommended on: Service-Fee Transparency. See flag detail in the signals section.

Estimated recovery potential

\$2,410–\$7,970	\$28,962	591–1952x
Estimated monthly recovery range	Annualized at the conservative floor	Projected ROI on the \$49 scan

Estimated from ~2,192 monthly covers at an average check of \$75 (price tier \$\$\$, upscale category). We apply a 5% revenue lift per full star¹ and a 24% peak-hour uplift per half-star², assuming 0.1–0.2 stars of improvement inside 60–90 days after a single recommendation lands. Manager time saved on ~6 reviews/mo using defamation-safe drafts is added on top.³

Ranges, never point estimates. Recovery is conditional on executing at least one 30-day action from the plan below.

1. Luca, M. — Reviews, Reputation, and Revenue (HBS 12-016) — 5–9% revenue per star, independent restaurants; we use 5% lower bound (https://www.hbs.edu/ris/Publication%20Files/12-016_a7e4a5a2-03f9-490d-b093-8f951238dba2.pdf).

2. Anderson & Magruder (UC Berkeley) via ChowNow synthesis — 24% peak-hour uplift per half-star midpoint (<https://get.chownow.com/blog/impact-of-online-reviews-on-restaurants/>).

3. One-Haus 2025 Check Averages — QSR \$8–\$12 · casual \$28–\$52 · upscale \$55–\$95+ (<https://one-haus.com/blog/post/rising-check-averages-in-u-s-restaurants-causes-trends-and-strategies>).

Grow review volume — the compliant way

More recent reviews compound with the fixes in this scan: they improve Google local-pack ranking, smooth out the rating when a bad night happens, and give the 30/60/90 plan something to measure against. You have 487 lifetime reviews today — a realistic 60-day target is +12 to +25 new Google reviews at your current cover volume.

- QR card at bill drop. Print a neutral “How was it? Tell us on Google” QR on the check presenter. Given to every guest — never conditioned on a positive experience.
- Post-meal email or SMS (opt-in only). If you capture emails at reservation, send a single neutral follow-up within 24 hours linking directly to your Google Business Profile review form. Same wording for everyone; no pre-screening for satisfaction.
- Owner responses within 48 hours. Responding to reviews — positive and negative — is the single biggest signal Google associates with higher local ranking. Use the defamation-safe response templates later in this scan.
- Staff scripting, consistent across shifts. Train the FOH team on one sentence: “If you had a good time, we’d love a review on Google — no pressure either way.” No tip-linked asks. No competitions. No rewards.

- Google Business Profile hygiene. Keep hours, photos, menu link, and reservation link current. Post a weekly update. A complete profile gets asked for reviews more often by Google itself.

AVOID — these carry real penalties. Do not solicit reviews on Yelp — Yelp’s software actively filters solicited reviews to the “not recommended” section, where they don’t count toward your star rating¹. Do not offer discounts, free items, or contest entries in exchange for reviews — Google can remove reviews and suspend your Business Profile², and the FTC’s 2024 Final Rule allows civil penalties up to \$51,744 per violation³. Do not pre-screen (“review gating”) — asking only happy guests is an explicit policy violation.

1. Yelp Support — Don’t Ask for Reviews — Yelp’s solicitation policy and automated filter behavior (https://www.yelp-support.com/article/Don-t-Ask-for-Reviews?l=en_US).

2. Google Business Profile — Prohibited content — No selective solicitation, no incentivized reviews, no gating (<https://support.google.com/contributor/answer/7400114>).

3. FTC Final Rule on Consumer Reviews (effective Oct 21, 2024) — Bans fake, incentivized, and insider reviews; up to \$51,744 per violation (https://www.wilmerhale.com/-/media/files/shared_content/editorial/publications/wh_publications/client_alert_pdfs/20241009-ftc-finalizes-rule-banning-fake-reviews.pdf).

Defamation – safe response drafts

Five drafts tied to the most recent lower-rated public reviews. All drafts follow three rules: acknowledge without admitting fault, move the conversation off the public thread, and avoid naming any individual staff or guest. Every draft requires human approval before publishing.

About the methodology

JetPakt ReviewSentinel pulls verbatim public review text, maps each excerpt to a controlled signal taxonomy, and scores severity from recent negative share × recency × evidence density. No individuals are named in generated body copy. Reviewer first names may appear inside verbatim quotes because they belong to the reviewer, not the business. Response drafts are generated from templates and always require human approval before publication. Legal-flagged signals (service fees, food safety, billing disputes) should be routed through ownership and legal review prior to any public response.
